

# Connexall<sup>®</sup>

The Heart of Connected Care.

## CLINICAL ELE-ATE

**H**ospital leaders are passionate about keeping patients safe and delivering the highest quality of care. That's why they need data-driven insights regarding their clinical team's challenges.

---

**Clinical Elevate delivers deep clinical insight paired with the hospital's current workflows to deliver better bedside care.**

## Clinician and patient impacts

The prevalence of alarms in hospitals can be overwhelming. Connexall helps you gain control of the noise by directing the right information to the right person at the right time. "Connexall's clinical and technology experts dive deep into your current workflows and technologies," explains Jan Capps, Director of Clinical Outcomes and Services. "We identify opportunities for improvement that best meet the needs of your staff and patients."

Reduce alarm fatigue

Reduce clinical burnout

Streamline clinical communication

Quieter healing environment for patients

Enhance clinician response times

## How Elevate Works

Connexall Elevate is tailored and scaled to provide "actionable insights" at the point of care. Connexall's Elevate Team of registered nurses (i.e., informaticists), and experienced technology leaders, come on-site to derive insights from:

Observation and interviews

Onsite discovery

Data analysis

Post-implementation follow-up.

## Experienced Team

Our Elevate Clinical Team comprised of advance practice nurse informaticists boasts more than two decades of clinical alarm management and workflow deployment experience, and hundreds of successful implementations. We will work within your clinical governance structure and data-driven insights to surface and optimize clinical workflows.

## Why this is Important to Nursing and Technology Leaders

Experience matters. We can confidently say, "We've seen it all" and "no two hospitals are the same." But you do have clinical workflow similarities, and common frustrations, and we're confident we'll find the answers for you and your team's situation.
